NAK=D

Summer 2020 Internship @ Naked Labs

About Naked Labs:
At Naked Labs, our mission is to inspire health through honest insights. We believe the only fitness metric worth tracking is progress because progress is what motivates people to achieve their goals. With Naked, the world's first home 3D body scanner, we've created a game changing new category for health and wellness. AND we know we've just scratched the surface of what can be enabled when you can quickly and easily capture 3D body models: fitness is only the beginning!

We're looking for highly-motivated interns, who are willing to learn new skills, get in touch with state-of-the-art technology, and work on exciting ideas.

Relevant Topics:
Based on your experience and interests, you will work on topics in the following areas:
- Large-scale data processing pipelines for synthetic and real data
- High-performance motion capture systems
- Machine learning and artificial intelligence

Qualifications:
- Relevant fields of study: Software Development, Computer Science, Telematics, Information and Computer Engineering, Technical Mathematics, and similar
- Experience in C++ or Python, and Linux environments
- Interested in popular computer vision/machine learning libraries (OpenCV, Eigen, Tensorflow, etc.)

Details and Contact:
We offer a full-time internship with a duration of up to 2 months, with a possible starting date in the beginning of July or August. Our office is located in the Space One, Kratkystraße 2, 8020 Graz, Austria. The gross salary shall be €1.800,-/month.

Please send your applications via email to: Gottfried Munda, gottfried@nakedlabs.com
